Setting up a Midjourney account
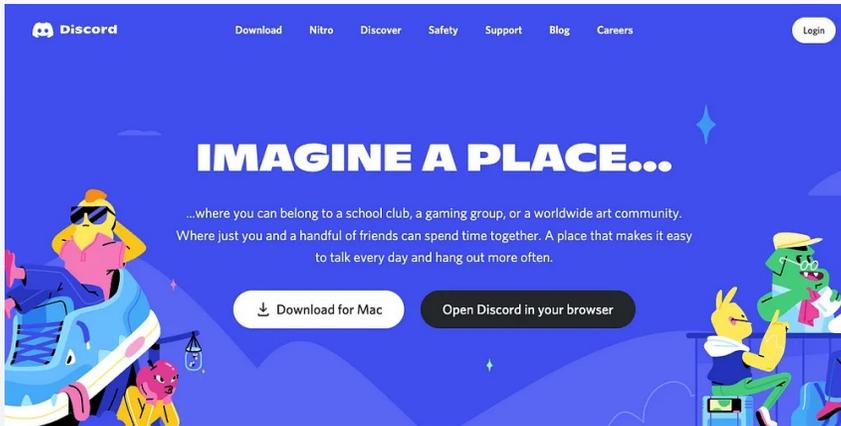

Midjourney

Setting up an account

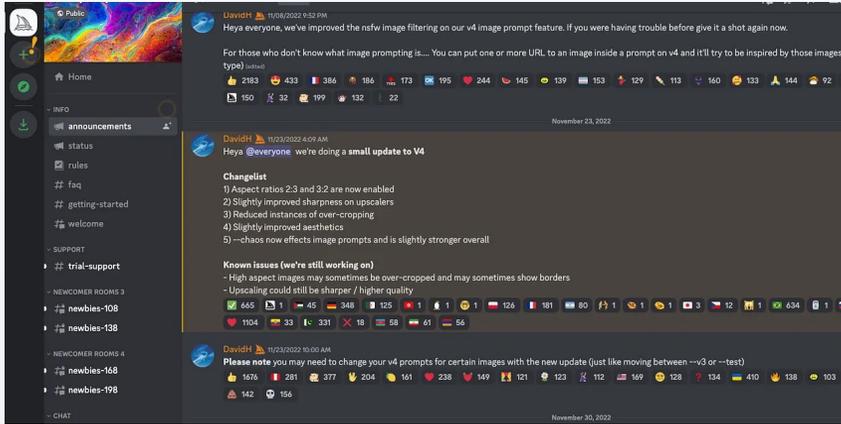

You can create a Midjourney account in the following way:

1. Go to **https://midjourney.com** and click the **Join the Beta** button in the bottom-right corner. Alternatively, click the following link to the Midjourney AI discord page **https://discord.com/invite/midjourney**

2. Click Accept Invite.

3. Enter a username in the box provided and click Continue.

4. You will be redirected to Midjourney AI. Click the Claim Account button to verify your account.

5. Enter your email address and password and click the Claim Account button.
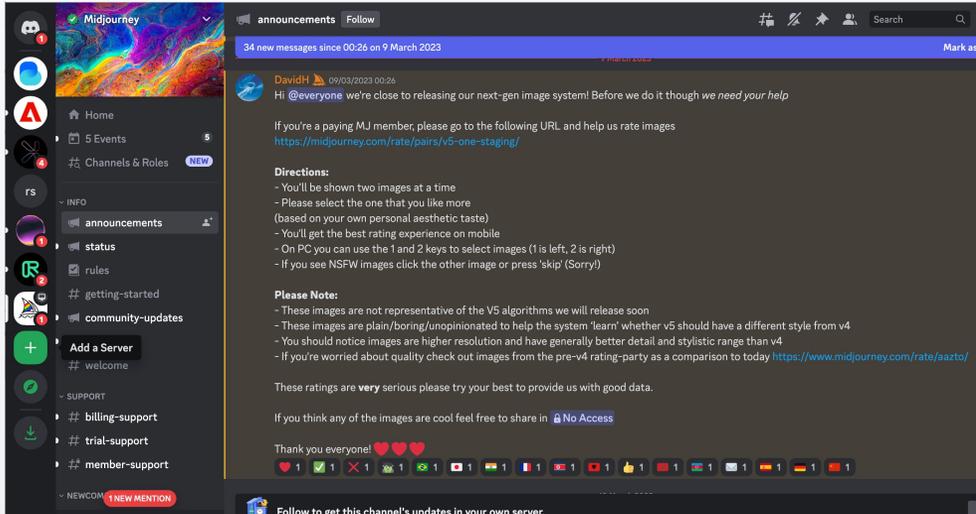

Midjourney

Setting up an account

Once you are logged in:

1. Select a newbies channel. After signing into your account, you will see the newbies channel option on the left-hand side menu. Select any newbies-# channel from the menu.

2. You must use the **/imagine** command before writing a prompt on Midjourney AI. The platform interprets the text after this command and generates the AI image accordingly.

3. Prompt away!

## Setting up your own server (optional)

1. Go into your Midjourney account

2. On the left hand side click Add a server (green plus button)

3. Choose Create my own,

4. Click for me and my friends,

5. Name your server and click create.

6. Go back to the public mid journey server,

7. Find any post created by the Midjourney bot and click its username.

8. Click add to server,

9. Choose the new server you just made from the drop down menu and click Continue.

10. You now have your own private server that is a totally clean workspace for you to create with.
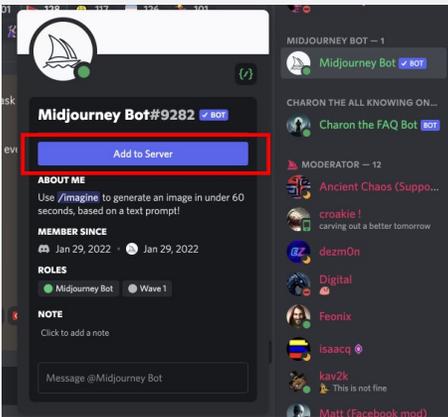

Midjourney

Adding the MJ bot to your server

1. Click any of the "Newcomer Rooms" on the left panel.

2. You will see many posts created by the Midjourney Bot. Click one of its names, "Midjourney Bot," or the "profile picture."

3. Click "Add to Server."

4. Choose the server where you want to add the Midjourney bot.

5. Click "Continue."

6. Click "Authorize."

7. Confirm you are human, and congratulations, you have successfully added the bot!
